LinkComm Releases Notes

Status	**RELEASE**	**Current FW Version**	**V4.1.2_r17**
Owner	R&D / PM	**Last Modified**	November 20th, 2026

- Added MQTT/MQTTS telemetry for XLink 2000 (fw v1.02.10), with client ID field.
- Added certificate support for secure HTTP/S telemetry on XLink 2000, including password-protected certificates. The improved certificate upload experience is now also available for SatLink 3.
- Added a modem-specific warmup time setting for powered modem communications.
- Added setup checks that catch unsupported configurations: duplicate SDI-12 addresses, multiple 2-wire resistance sensors on iRef, empty static IPv4 subnet prefixes, and corrupted firmware files.
- Fixed several XLink 2000 UI and sync issues. Improved setup sync status, calibration offset persistence, keyboard handling in dialogs, and log file scrolling on mobile.
- Firmware included: SatLink3 v887r4112, XLink 100/500 v887r4112, ecoLog 1000 v2.00.8, SensorLink 1000 v2.00.4.
