PM-Series Pyranometer Mounts

APPLICATIONS

Pole-mounted installations
Meteorological stations
Environmental monitoring networks

One Bracket. Four Configurations.

Durable Installations, Simplified.

One mount. Four configurations. Broad pyranometer compatibility. Designed to standardize installations across meteorological stations, solar plants, and monitoring networks.

KEY BENEFITS

1. Simplified Installations

A single L-bracket platform, with standardized hardware and minimal tool set requirements, this mount is quick to fit and service.

2. Precision Leveling (Pro kits)

PM100 Pro and PM200 Pro add Accutilt leveling with independent pitch and roll for fast, repeatable plane-of-array alignment.

3. Broad Compatability

Fits Kipp & Zonen two-bolt pyranometers (SP Lite2, SMPx and CMPx series). The bracket is also compatible with other center-mount pyranometers.

4. Built to Withstand the Elements

Made with thick anodized-aluminum construction and stainless hardware for long-term outdoor durability.

SPECIFICATIONS

Item Number (PM100)	810306-01
Item Number (PM100 Pro)	810306-03
Item Number (PM200)	810306-04
Item Number (PM200 Pro)	810306-06
Materials	Anodized aluminium, stainless steel, outdoor-rated HDPE
Dimensions	160 x 132 x 151 mm
Weight	512 g
