

Weather Intelligence You Can Trust

WS J-Series Smart Weather Sensors

Powered by the proven Lufft platform, delivering reliable environmental intelligence for forecasting, weather monitoring and public safety.

Protect Data Integrity

Long-term measurement stability through no-moving-parts sensing, WMO-aspirated measurements and a new temperature-controlled ADC.

Standardise Across Your Network

One platform, common protocols and read/write SDI-12 support simplify deployment and maintenance.

Detect Issues Before They Become Problems

Built-in diagnostics and heater voltage monitoring help expose issues before they impact data quality.

Reduce Operational Overhead

WMO-compliant wind gusts and present weather reporting support trusted environmental observations.

**Trusted observations. Reliable records.
Better decisions.**

Build a network you can trust for years to come.
