HACH® SERVICE

Service Data Sheet

Filtrax

Sample Filtration System

The Filtrax is an essential component of your Amtax sc or Phosphax sc measurement system, which requires regular maintenance for proper operation. Let Hach Service manage your maintenance to maximise uptime and prevent Amtax sc or Phosphax sc measurement issues.

Benefits of Service

- Ensures maintenance is done properly and on schedule to maximise uptime and extend instrument life
- Prevents associated Amtax sc/Phosphax sc measurement issues resulting from inadequate sample filtration or delivery
- Eliminates time and hassle of performing service and managing maintenance schedules
- Relieves your team's burden of handling heavy instrumentation for service
- Technical Support hotline provides rapid and direct resolution and field support when an immediate fix is not possible

Annual Average Maintenance Time: Up to 3 hours
Recommended Maintenance Frequency: 2x / year

Essential Maintenance Tasks Performed

Routine:

- Inspect general instrument function, filter module venting, control unit air filter, and quality of filtered samples
- Clean filter modules and sample tubes
- Replace pump tubes and control unit air filter
- Perform full functional test

Advanced:

- Check function of control unit, display, and mounting
- Replace connecting tubes, pump cartridges, pump rollers, compressor air filter, compressor, and filter module
- Troubleshoot and resolve any warnings or faults
- Produce service report and performance certificate

Parts Replaced During Maintenance

Part #	Description	Qty.	Frequency
LZX018	Annual Maintenance Kit	1	12 months
LZX677	Filter module	1	12 months
LZX024	Compressor	1	24 months

These parts and replacement labour are included with a Hach Service Plan at the recommended frequency as long as the plan is renewed. Coverage is available for on-site repairs.
