

Protect uptime in 2026 **UPGRADE NOW!**

Aging equipment can quickly become a risk. Whether you're using older Hach instruments or another brand, some legacy models are no longer supported or serviced. Speak with our Sales Team today to explore upgrade options.

PROCESS INSTRUMENTATION

Old

UPGRADE

Advantages

SC100/200 Controllers

SC4500 & SC1000
Controllers

- Sc4500: Scalable and future-ready, works with 30+ digital or analog sensors of up to 17 different parameters
- SC1000: Maximum flexibility, multi-sensor, multi-parameter platform, plug-and-play operation

Amtax
Ammonia
Analyser

NH6000sc
Ammonia
Analyser

- Maximise uptime and accuracy with trusted GSE technology
- Save time with biannual maintenance
- Robust and lightweight integrated filtration options

Phosphax sc
Phosphate
Analyser

NP6000sc
Phosphate
Analyser

- Grab sample for lab measurement comparison
- Consistent reliable data
- Reduced touch points (twice per year)
- Lightweight, integrated filtration system

1720e or FT600 Turbidity Analyser

TU53/TU54
Turbidity
Analyser

- Groundbreaking 360° x 90° detection technology
- Matching lab and online results
- Easier maintenance and auto cleaning

CL17
Chlorine
Analyser

CL17sc
Colorimetric
Chlorine Analyser

- Maintenance made easy
- Expanded connectivity
- Increased flexibility
- Peace of mind through comprehensive diagnostics

LABORATORY INSTRUMENTATION

Old

UPGRADE

Advantages

2100P Turbidimeter

2100Q Turbidimeter

- Easy calibration and verification
- Accurate for rapidly settling samples
- Optical system for field precision
- Simple data transfer
- Convenient data logging

2100N/AN Turbidimeter

TL23xx or TU5200 Turbidimeter

- Improved and intuitive design
- Groundbreaking 360° x 90° detection technology (TU5200)
- Matching lab and online results
- EPA or ISO with Tungsten or LED option (TL23XX)

DR2***/5000 Spectrophotometers

DR3900/DR6000 Spectrophotometers

- Simple preparation, fast execution
- Automatically avoids errors
- Accessories for high volume and high accuracy testing needs
- Guided procedures
- VIS and UV/VIS

SD900 Max Portable Sampler
SD900 AWRS

AS950 Portable Sampler
AS950 AWRS

- Easy and intuitive operation
- Simple maintenance at low cost
- Convenient data transfer and programming available
- Portable field and refrigerated options for compact or discrete sampling

HQd Series
SensiON+
Meters

HQ Series

- HQ Series Portable Meter Rugged, intuitive meter for field and lab electrochemical analysis
- HQD Benchtop Meters Lab-only meters for professionals needing dedicated setups
- Intellical Probes: Compatible with both meters—measure pH, DO, EC, TDS, and more
