Hach Service 3-Point Protection

Establish Performance

Calibration/ Certification

We know how important instrument calibration and certification is in maintaining regulatory compliance. As part of the service we provide for the HQ Series meters, we certify that the instrument is performing to our factory specifications and provide the documentation you need to minimise compliance risk. New to the HQ Series, the performance certificate is available for download directly from the meter, eliminating the need to manage paperwork.

Extend Performance

Routine Maintenance

Every analytical instrument requires some level of routine maintenance to assure accuracy and minimise downtime. With a Hach Service Plan, we ease the burden by helping you manage your HQ Series meter maintenance schedule and free up your internal resources to focus on other priorities.

Repair

We understand the impact to your process and your operations when your equipment goes down. You need a service partner who has the resources necessary to get you back up and running fast. With repair coverage through a Hach Service Plan, you get priority service from skilled professionals with the knowledge, tools, and parts readily available to restore your HQ Series meter to proper operation as quickly as possible. Having Hach Service perform your repairs assures your stored data is protected and the meter's IP67 rating is maintained to prevent failures resulting from dust and water intrusion.

Elevate Performance

Advanced Maintenance

With ease of use and improved diagnostics comes behind-the-scenes complexity that requires special tools and skills that Hach Service is uniquely qualified to provide. HQ Series meter advanced maintenance includes a 9-point inspection to gain deeper insight into the performance of the instrument. This allows Hach Service to predict when parts need to be replaced before they fail, preventing unexpected downtime and impact to your operations.
