

CL17sc

Colorimetric Chlorine Analyzer

The CL17sc is an essential part of your disinfection process. Let Hach Service help ensure your chlorine measurements are reliable, accurate, and available when you need them for regulatory reporting or process optimization.

Benefits of Service

- Ensures critical chlorine measurements are reliable and accurate throughout the full measuring range
- Detects and prevents potential issues that can degrade performance or reduce instrument life
- Provides documentation to support regulatory compliance
- Removes the burden of managing maintenance schedules
- Technical Support hotline provides rapid and direct resolution and field support when an immediate fix is not possible

Annual Average Maintenance Time: Up to 2 hours
Recommended Maintenance Frequency: 2x / year

Essential Maintenance Tasks Performed

Routine:

- Replace tubing kit
- Clean colorimeter
- Update to the latest firmware version
- Verify sample flow rate and adjust as needed

Advanced:

- Inspect pinch plates and pump for visual damage or issues
- Troubleshoot and resolve any error or warning messages
- Review system diagnostics to verify proper functioning of the colorimeter and average flow rate
- Perform 3-point calibration verification with primary chlorine standards to ensure full-range measurement accuracy
- Produce service report and performance certificate

Parts Replaced During Maintenance			
Part #	Description	Qty.	Frequency
8560400	Tubing Kit	1	6 months

These parts and replacement labor are included with a Hach Service Plan at the recommended frequency. Coverage is available for repairs on site or at the Hach Service Center.
