# Installation of SQL Server 2012 Express

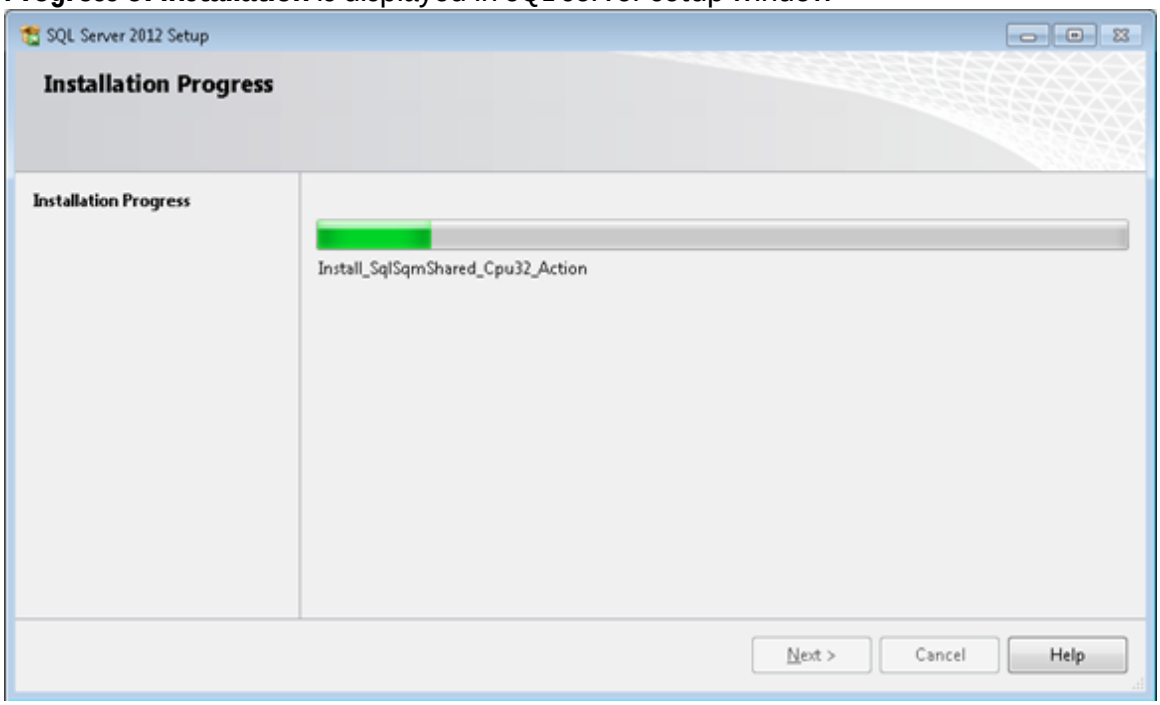

This document helps you in installing SQL Server 2012 Express edition and configured to work with TM1000.

## Installation of SQL Server Express 2012

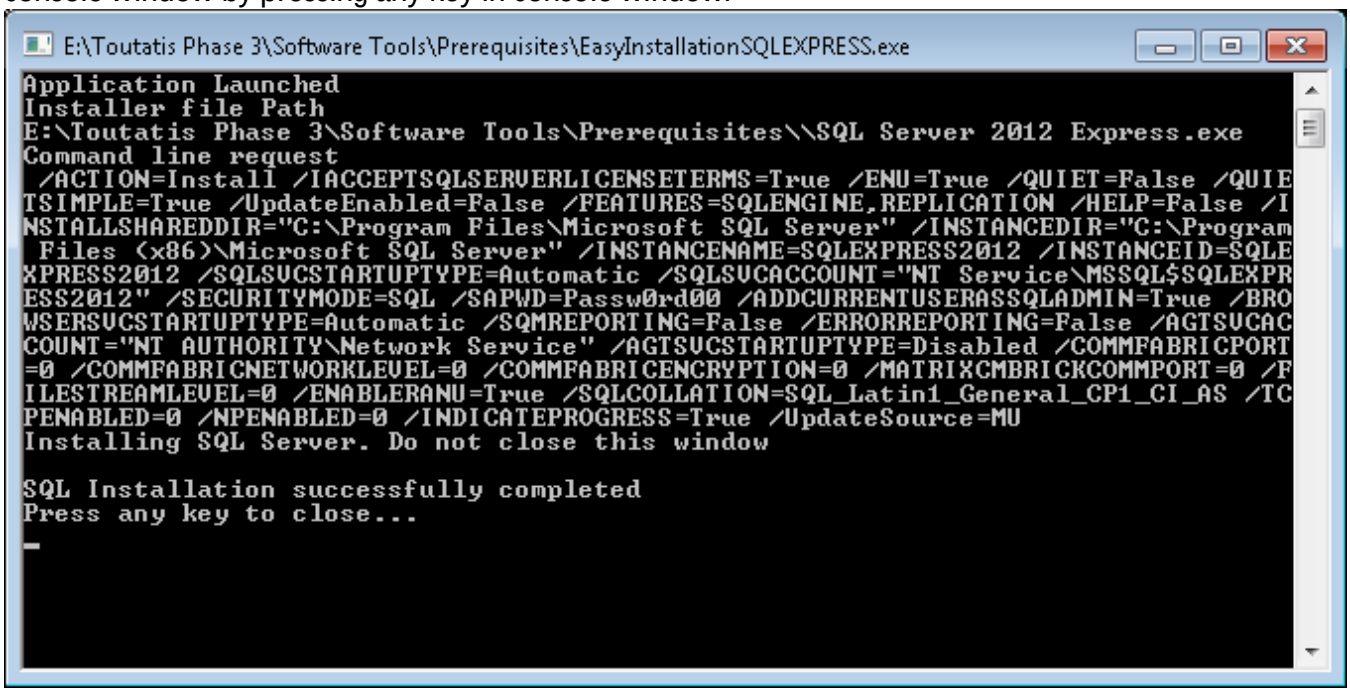

To begin, launch the install program (**EasyInstallationSQLExpress.exe**). A console window is displayed. **Do not close the window** until installation completes. Execution of this application requires Administrator access.

**Progress of installation** is displayed in SQL server setup window

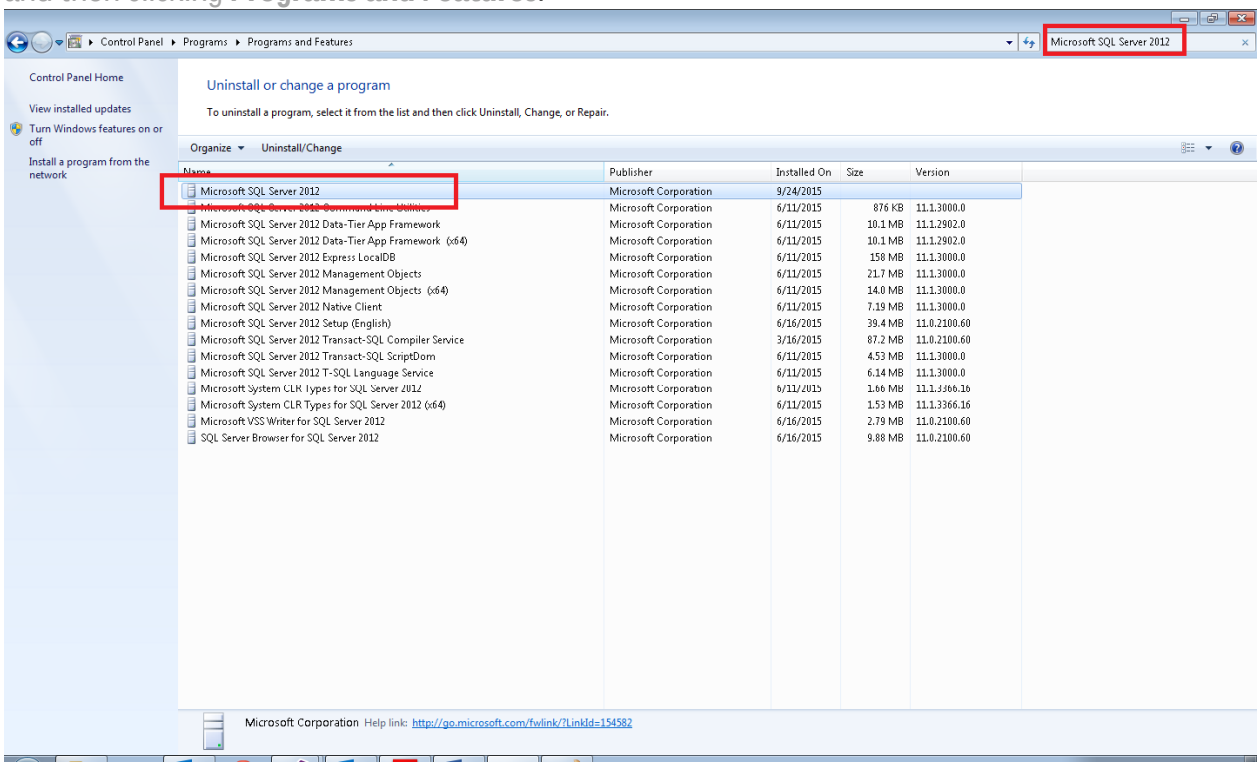

Once the installation completes, success message is displayed in console window, user can close the console window by pressing any key in console window.

Confirm the proper installation of Microsoft SQL Server 2012 in **Programs and Features** in **Control Panel** of system and search for "**Microsoft SQL Server 2012**"

Open **Programs and Features** by clicking the **Start** button, clicking **Control Panel**, clicking **Programs**, and then clicking **Programs and Features**.

If the application is not installed (not listed in Programs and Features), please restart computer and try again.

If SQL is installed through this application, no need to configure database settings in TM1000.
