

## BioTector B7000 TOC TP Analyzer—Information Sheet

---

The BioTector B7000 TOC TN TP manuals are supplied with BioTector B7000 TOC TP analyzers.

BioTector B7000 TOC TP analyzers have the same components (e.g., valves, pumps, tubing and fittings) as the TOC TN TP analyzers and use the same reagents (e.g., TN cleaning solution and TN DI water). So, the installation, startup and maintenance steps are the same.

The only difference between the TOC TN TP and TOC TP analyzers is that the TOC TP analyzers do not measure total nitrogen (TN). Thus, the TN settings, messages and software functions are disabled in the TOC TP firmware.

For the TOC TP analyzers, ignore the content in the BioTector B7000 TOC TN TP manuals where the TN related settings, messages and software functions are given.
