

Be Right™

Accurate, fast, and simple wastewater tests for SARS-CoV-2 and beyond

Know the level of SARS-CoV-2 in wastewater in less than an hour after testing.

The Cepheid GeneXpert is the first fully automated PCR test designed specifically for testing pathogens such as SARS-CoV-2 in wastewater.

Designed to eliminate the need for manual and complicated extraction processes, it is easy for anyone to use and provides consistent, comparable results over time and across sites.

The test is cost-effective, with no need for expensive equipment or specialized lab expertise, and with results available within an hour, it generates near real-time data, enabling better improved decision-making for public health.

Build a robust wastewater monitoring program with ease and confidence using the Cepheid GeneXpert.
