

SC4500 Software Package 2.54 – 2023.2 R1 Release Notes

This document contains details about the latest release of SC4500

Release date: September 21st, 2023

What's new – Probe support

Adding support of GS1440/GS2440EX H2S sensors and CDx440sc digital gateway

The CDx440sc digital SC gateway powers the GS1440//GS2440EX H2S sensors, monitors its status, and collects measurement data to be sent to the SC4500 controller every five seconds. See manual for additional information.

Adding support of RTC-SP

The RTC-SP virtual module can be installed from factory or installed later in the field. RTC-SP is a combined module to manage sludge in wastewater treatment. This module provides the capability to do sludge dewatering and sludge thickening. See manual for additional information.

What's New – Claros

Improvement for Claros connected devices

Check this page for a full list of software releases, upgrades, and technical specifications for Claros, the Water Intelligence System from Hach.
