

# Hach WIMS & JOB Cal Expert Services

## Leverage Your Software and Instrument Investment

### System Startup and Implementation Services

Hach WIMS & JOB Cal expert services, provided either via the internet or on-site, ensure a smooth and worry-free installation and solution startup. These services provide the technology, team & tools to ensure your system startup and implementation is supported by a knowledgeable team of professionals.

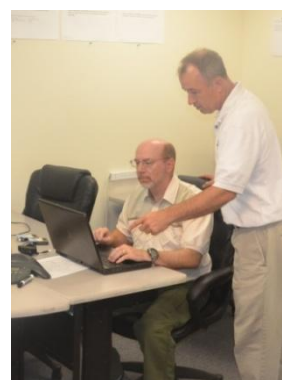

Services can be as in-depth as needed. They can range from a minimal set up and instruction on how to complete the work on your own or they can provide a full, turn-key implementation. Basic user training is always included to assure you have a good understanding of how your system works, learn best practices, and how to continue to expand your system utilization to get the most out of your investment.

### Ongoing Services

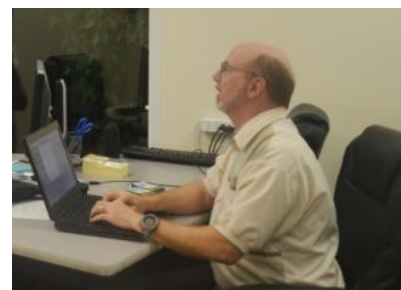

Expert services can also be an important resource after your system has been operational for a while. Either through training or additional services you can:

- Effectively and efficiently train new employees
- Save more time by automating more reports and data collection processes
- Automate data transfer from SCADA systems and LIMS systems
- Empower access to information for users at all levels within your organization
- Implement powerful trending, graphing, and trigger reporting features
- Learn important tips and tricks for administration of your WIMS/JOB Cal Solution
- Learn best practices
- Get more out of your instrument investment by fully utilizing the information it provides

Whether in a group setting or with individual instruction, Hach can increase your expertise.
