

Protect Your Assets and Avoid Downtime

It's time to upgrade to Windows 11

As of October 14, 2025, Microsoft will no longer provide free technical support, feature updates, and security updates or fixes for Windows 10. While your Windows 10 PC will continue to function after this date, it will be at greater risk for viruses, malware, and other cyberattacks. We recommend transitioning to Windows 11, a version of Windows that is still supported by Microsoft.

Upgrading to Windows 11 is the best way to keep your system secure, as it provides the latest security features and regular security updates from Microsoft to protect against the latest threats.

Aria CARE is here to help

Compatibility concerns with other connected controls and software may pose a challenge to updating the operating system in your Aria Filtra® system. Our technical service engineers are here to help you keep your water treatment systems running smoothly and your IT secure. By leveraging decades of experience and expertise from the Aria CARE™ Service Team, you can upgrade your systems to the safest software with little to no interruption to operations.

For help, reach out to our support team. Our technical experts will help assess your upgrade needs.

Lifecycle service offerings

Our Aria CARE team will work with you to determine which upgrades apply to your system and help you plan the best timing for your unique needs. Get ahead of upgrades to avoid emergency maintenance.

Health check: Get a full review of control systems and components, resulting in a detailed report of service needs with recommended timing and quotes to help you budget.

Process optimization: Pinpoint root cause of operational fluctuations since initial startup; improve performance; increase productivity; and potentially reduce chemical, energy, and time demands.

Operator skills training: Refresh skills, gain continuing education units, train new recruits, and learn beneficial best practices.

Membrane module replacement: Prevent premature module aging throughout the life of your plant with help from the Aria CARE team. We can also calculate the estimated ROI of replacement in different years so you can plan your budget.

Replacement and equipment upgrades

No need for our experts? No problem. We are still here to provide the most advanced equipment and membrane solutions in the business. Call us when you need:

Spare parts supply: We are your one-stop shop for all parts associated with Aria Filtra systems. Call us for a list of critical spares for your system.

Software upgrades: Improve performance, increase reliability, and keep your system secure by upgrading to state-of-the-art software and the latest hardware to comply with regulatory needs.
