

Optimize Your Operation

aria^{CARE™}

Aria Filtra – Health Check

Aria Filtra® offers a comprehensive range of services that provide a convenient and reliable way to ensure efficient system operation and minimal downtime.

Our Health Check service offers a time-stamped diagnostic assessment of your system while focusing on the heart of it, the Aria Filtra hollow fiber membranes.

Importance of Health Checks

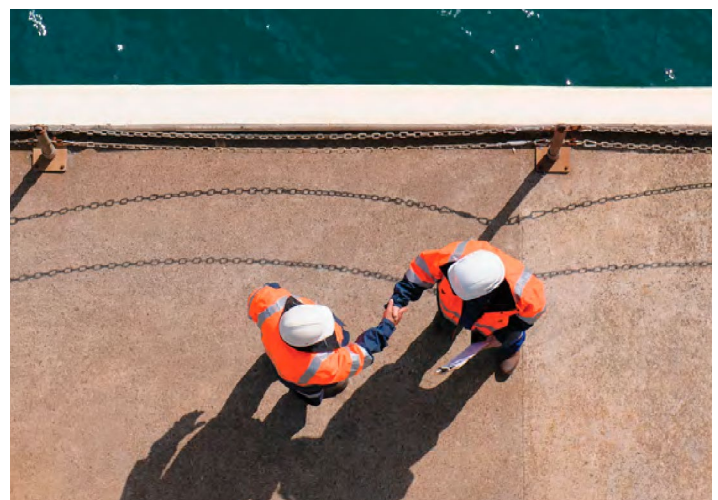

Regular servicing is a proactive measure to maintain high standards, regulatory compliance, and protection of the Aria Filtra membranes. Routine scheduled maintenance ensures efficient operation, saving time and operating costs over the long term.

Benefits

The Health Check service provides a practical assessment of your system, allowing you to proactively plan for future needs such as module replacement, SCADA and operating system updates, and spare parts. The Health Check service helps you maximize productivity and extend system longevity, which in turn reduces operating costs through improved functionality.

Functional System Benefits:

- Lower operational costs
- Update to operator skill set
- Improved system productivity
- Improvements to the CIP process
- Evaluation of EFM frequency and effectiveness
- Extension of membrane module life.

How it Works

During our health check, we perform a detailed inspection of your system to ensure your plant is running optimally and the membranes are positioned to provide years of service.

HEALTH CHECK

Arrival On Site

- | | |
|--|---|
| Aria Filtra Field Service Expert Arrives and meets with staff. | ✓ |
| Review the plan specification and establish a baseline. | ✓ |

System Health Check

Our experts perform a comprehensive system review:

- | | |
|---|---|
| Membrane Rack Operations Inspection | ✓ |
| CIP Process Inspection | ✓ |
| System Controls and Electrical Inspection | ✓ |
| System Mechanical Inspection | ✓ |
