Quality Policy

At Trojan Technologies, we are dedicated to maintaining and building upon our high level of customer satisfaction in the UV & filtration treatment industry for Municipal, Industrial, Light Commercial and Residential customers, through the efforts of our associates and quality management system, in all our products and processes.

To achieve this we are committed to:

- Managing our performance against defined objectives
- Developing robust, repeatable processes that yield superior Quality, Delivery, and Cost
- Involvement of all associates in ensuring our quality objectives are achieved
- Meeting or exceeding statutory, regulatory and customer specific requirements, and the requirements of applicable standards, including ISO 9001:2015
- Continuous improvement of our products, services and overall quality management system through customer engagement and the utilization of the Veralto Enterprise System.
